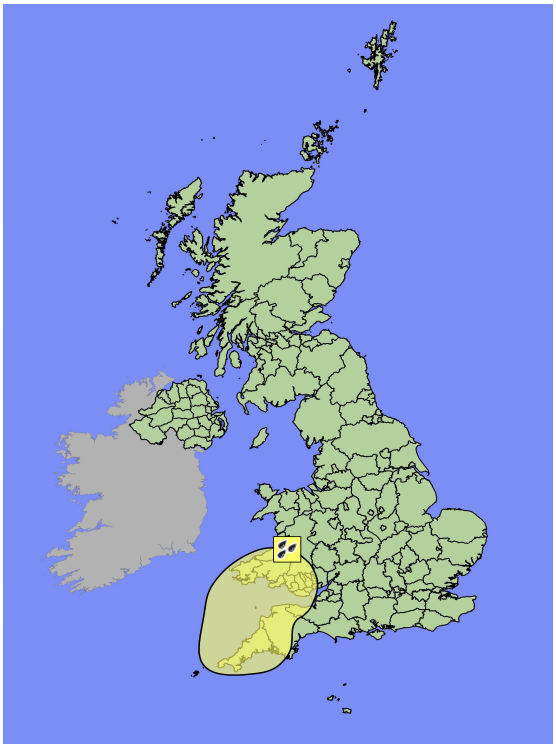
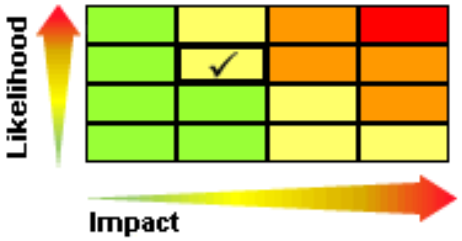
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system is expected to bring a period of heavy rain to parts of southwest England and south Wales during Monday. The heaviest rain is most likely to be across upland areas, with the southwest Moors and Welsh mountains particularly prone. Around 20 to 30 mm of rain seems likely to fall widely, with some upland locations receiving in excess of 60 mm. The rain should start to ease later in the day.

Accompanying the rain will be strong southerly winds and gusts to around 40 to 50 mph are possible along coasts and over high ground.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **06:00 on Mon, 27th Aug 2012** until **21:00 on Mon, 27th Aug 2012**

Heavy rain, accompanied by strong winds, is expected to spread northeastwards during Monday, to affect parts of southwest England and south Wales. The public should be aware of the possibility of surface water flooding and minor disruption to travel.
